Allowance

1. The following is an examiner's statement of reasons for allowance: this application is allowed in view of applicants' argument filed 06/07/2004. Applicants' arguments (see Remarks pages 13-15) that the solutions of releasing agent provided in Kwamoto being non-aqueous solutions and adding water to the releasing agents having hydrolysable functional group in Kwamoto rendering unsatisfactory modification are persuasive. Prior art of record does not disclose or suggest a method of depositing releasing agent on a surface of a workpiece comprising steps for, among others, providing a solution comprising the releasing agent and water (placing the workpiece in an aqueous solution containing a release agent) and providing ultrasonic or cavitation energy to the solution to coat the release agent to the workpiece surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
